

#### TECHNICAL SPECIFICATION:

Length:	173 mm
Width:	72 mm
Depth:	50 mm
Data Outlet Hole:	36mm x 22 mm
Conduit Entry Hole:	25 mm

## Description

IntroDelta distributes a non-metal data box manufactured from black uPVC. The box comprises of two sections, the main housing and a rear mounting plate.

The main housing provides holes for four data outlets (6C) and a preformed 25mm hole at the far end of the box for conduit entry. The rear mounting plate acts as a lid to the main housing. This section is hinged at one end and is secured by means of a screw at the other end. The mounting plate has two keyhole cut-outs to allow the box to be secured to a surface on the inside surfaces of a desk, wall or pillar, etc.

The uPVC is self extinguishing and conforms to the requirements of the American Underwriters Laboratory Standard for Safety, number UL94, to class V-0.

A uPVC bracket is also available. These brackets are ideal for securing a flexible conduit to the floor slab, where the data outlet box is presented above the floor level by means of flexible conduit. (SHA25B)
