

<b>TECHNICAL SPECIFICATION:</b>	<b>80mm</b>
Overall diameter of bezel:	91 mm
Fixing hole required:	79 mm
Flange depth below surface:	16 mm
Bezel thickness above surface:	3 mm
Inside diameter of flange:	73 mm
Max. cable diameter:	9 mm

## Description

The grommet consists of an outer flange, which push-fits into a circular aperture provided in the desk furniture or floor. The grommet has a top-assembly which is snapped into the outer flange. The top assembly has a cover which rotates to reveal access-holes. The cables are passed through the holes prior to the top assembly being inserted within the outer flange. This size grommet is intended for desks and work-surfaces and has been enhanced for desk application to incorporate a ratchet. This keeps the top cover fixed in one of four positions thus making available zero, one, two or three access holes. The selection of the appropriate number of holes promotes a clean and tidy appearance.

### COLOURS

Black, Grey or White.
