

GTAG 3

The Air-Guard® surface mount is designed as a retrofit unit to cover existing floor panel cut outs. This unit is an option when the [GTAG1](#) does not provide adequate cableway.

The GTAG 3 cable seal will cover an opening up to 200 x 200mm or can be used as two half units at the edge of the floor covering openings 200 x 100mm.

The Air-Guard® cable grommet provides an effective, easy to install and economical method to optimize the thermal management through a raised floor.

Dimensions

Overall Size : 250mm x 250mm x 25mm
Covers any hole up to : 200mm x 200mm

Features

- Overlapped brushes improves cable sealing properties
- Two piece assembly designed to allow retrofit around existing cables
- Flame retardant heavy duty ABS construction with nylon 6 brush
- Simple and inexpensive installation
- Air-Guard® integrates with the access floor static dissipative system
- RoHS compliant

Benefits

- Reduced airflow loss and increased under-floor static pressure
- Improved cooling efficiencies and extended cooling life
- Reduction of plant running costs by assisting proper airflow within the data room
- Assists achieving cold/ hot aisle concepts
- Assists in sealing under floor areas from contamination
